# **1. Introduction**

The main objective of this document is to highlight some of the main functions of the ColorPro program, which allows each client to set-up and personalize the program to better meet his/her needs.

This document also contains search tips, configuration options, toner color directions and answers to frequently asked questions (FAQ).

To make your user experience with ColorPro easier, on the following pages we will show the main tools and functions offered by the program.

# 2. Minimum recommended computer configuration

- > Pentium IV or superior
- ➢ RAM memory of 512 MB
- > 500 MB free hard drive space
- Windows XP or later
- Mouse and color monitor

#### 2.1 Video card configurations

Minimum resolution for screen size

Screen resolution 1024 x 768 pixels

**OBS**: For your information: below a table of the video configurations in ascending order:

Screen resolution
800 x 600 pixels
1024 x 768 pixels
1152 x 864 pixels

On some computers, after the installation of ColorPro the screen gets too big. In this case the screen configurations must be altered. To do this click with the **right mouse button** while at the desktop screen and click on **Screen resolution**:

	View	- <b>F</b>
	Sort by	
	Refresh	
	Paste	
	Paste shortcut	
	Propriedades gráficas	
	Opções gráficas	•
	New	•
<b>1</b>	Screen resolution	
	Gadgets	
2	Personalize	

Configure the **screen resolution**:

isplay 🕨 Screen	Resolution		
Change the	appearance of your display		
			Detect Identify
Display:	1. HP L1750 V		
Resolution: Orientation:	1024 × 768     ▼       Landscape		
			Advanced settings
Make text and o	ther items larger or smaller		
What display set	ttings should I choose?		
		ОК	Cancel Apply

# 3. Installation Guide

#### 3.1. Steps to Install MONO

1) When you insert the CD, the installation will automatically start. Choose the installation language.

2) Click Next and then choose the option ColorPro Mono.

📀 Setup - ColorPro
Select Components Which components should be installed?
Select the components you want to install; dear the components you do not want to install. Click Next when you are ready to continue.
ColorPro Mono 🔹
< Back Next > Cancel

3) Click Next and the selection screen distribution will be displayed; at this stage choose the database you want to install: Full: Wanda + Sikkens, Partial: Sikkens or Partial: Wanda.

4) Click Next and subsequently Install.

**5)** When this first process is finished a window will pop up. Select the product lines for installation and hit **Continue**.

Database
Product lines         ♥ Autobase Classic         ♥ Autobase Plus 100:50         ♥ Autocryl Plus         ♥ Autoryl Plus LV         ♥ Autoryl Plus LV         ♥ Autoryl Plus LX         ♥ Esonal 2K         ♥ Lesonal 2K         ♥ Wanda PU HS         ♥ Wandabase HS
Continue

6) When the process is completed click on **Finish**. This way the program was updated without losing any important data (prices, stock levels and own formulas).

## 3.2. Steps to Installation NETWORK

#### - Server

**ATTENTION:** It is important to know where the ColorPro database is located to do so; open ColorPro and press CTRL + H and a message is open about the directory where you will have the last row. After, you need to **STOP** the execution of Firebird that is currently installed on the server.

1) Same as step 1 of installation MONO

2) Click **Next** and choose the option **Firebird Server**; if a message box like the example below pops up, click YES and continue the process.

Componer	nts Exist
?	Setup has detected that the following components are already installed on your computer:
	ColorPro Documentação Cliente Firebird Updates
	Deselecting these components will not uninstall them. Would you like to continue anyway?
	Sim Não

**3)** It the screen below may pop up where you have to input the same directory accessible on ColorPro (According to the warning **note**).

Data directo				
Where is th	ne data directory?			
Plese, infor don't know,	m the directory where , ask your network ad	e ColorPro database Iministrator.	was installed in the	server. If you
Directory:				
C:\Users\P	ublic\ColorPro			

4) Then follow the steps 2 through 6 to install Mono.

5) After finishing the installation of Firebird, start the installation again; only this time choose ColorPro Client / Server.

6) Fill the server **name** where the ColorPro is being installed and the **directory** of the database and continue the installation by pressing **Next** > **Next** > **Next** > **Install**.

#### - At the Stations

1) Same as step 1 of installation Mono.

2) Click Next and choose the option ColorPro Client / Server, fill in the server name where the ColorPro was installed and the directory of the database and continue the installation by pressing Next > Next > Next > Install.

**ATTENTION:** We recommend the support of the network administrator for the completion of the set-up of networking.

#### 3.3. Windows XP:

To perform the installation in Windows Seven (7) just follow the same steps, but remember that the directory of Windows XP is different, instead of *C:\Users\Public\ColorPro* is:

#### C:\Documents and Settings\All Users\ColorPro

#### 3.4. After installation

After have completed the ColorPro installation in your computer, before of start the use to check if all toners are activated ( \_\_\_\_\_\_) for use in:

**Registers -> Toners...** 

## 4. Automatic Backup of the Previous Version of ColorPro

You can revert the database if an error occurs during installation of a new version of ColorPro. How it works:

**1** - When you start installing the new version automatically, without your knowing, the ColorPro will generate a file called OLDCOLOR.FDB (this file is generated in the old database with all the information). This backup will be generated in the following directory:

#### C:\Users\Public\ColorPro.

C:\Users\Public\ColorPro				
Organize 💌 📄 Open Share with 💌	Burn New folder			
🔆 Favorites	Name	Date modified	Туре	Size
🧮 Desktop	CodeLoc	11/12/2013 08:51	File folder	
🗼 Downloads	Docs	11/12/2013 08:50	File folder	
🕮 Recent Places	\mu HTML	11/12/2013 08:51	File folder	
	irebird.log	11/12/2013 08:43	Text Document	1 KE
🥽 Libraries	🥌 logo.hmp	22/09/2008 14:38	Bitmap image	2 KF
Documents	OLDCOLOR.FDB	11/12/2013 08:43	FDB File	222.592 KB
👌 Music	splash.bmp	22/09/2008 14:38	Bitmap image	452 Kt
Pictures	UPD20131210.LOG	10/12/2013 15:46	Text Document	2 KE
		11 (10 (0010 00 40	T . D .	4.1/0

2 – If you have any problems with the new database you can go back to the old base as follows:

a) First you must delete or remove in this folder the file COLORPRO.FDB.

b) Rename the file to OLDCOLOR.FDB to COLORPRO.FDB.

c) After doing the above processes, simply boot your ColorPro it will have your old database restored.

# 5. Controlling your stock

## 5.1. Registering your stock

To make the launch of information about your stock is necessary to go to **Registers > Toners...** 

Then, click Entry on the top screen.

After you click Entry, you will see the window below:

Toner entries			x
Product Autocoat BT 100	)		Ţ
Toner			
BT00			
© Queuing Closs	<ul> <li>Inventory</li> <li>Re-stock</li> </ul>	<ul> <li>Transfer</li> <li>Purchase</li> </ul>	
Turnover <ul> <li>Input</li> <li>Output</li> </ul>	Quantity 0,00 UN	<u> <u> </u> <u> </u></u>	0,00
Invoice	G		
		OK Can	cel

In this step you should choose the product and toner you want to launch. You can choose the way of introduction could be in **G (grams)** or **UN (units)**. Besides you keep a historic for future consultations.

Finishing the procedure above, you will see a screen asking if you want to update the product price.

You must change it when there is any change in price. See picture below:

For you to see the entries that were made in a certain product, you just select the product desired and then click on the **Turnover**. See below are the pictures:

Reg	gister							
Tor	ners							
2 Edit	₽ View	2 Refresh	Filter	× All	Adjustment	2 Iurnover	کی Entry	Close
S/	Code	Colo	r Descrip	otion		Lis	st	Discount (%)
1	BT61	AZU	AVERN	ELHA	DO II		0,0	00
1	BT16	PRE	TO PRO	FUND	0		0,0	00
1	BT45	AMA	RELO B	RILHA	NTE		0,0	00

Start INVISIONE		End 19/09/2013			Rebesh		Pint:
Date	His	tory	Vo	lume	Packaging	Document	User

#### 5.2. Report of the turnovers

To see your turnovers report of your stock is necessary to go to Reports > Turnover...

With this new report, you can view all your turnovers realized in a given period (production, purchase, etc.). This is possible because of the filter options. See the image below:

Report parameters		×
Period Start 19/09/2013 IS	<u>E</u> nd	19/09/2013 🛐
Product		
<all products=""></all>		
User ∢All users>		
<u>R</u> epair Order <u>S</u> tart	<u>E</u> nd	
Sp <u>r</u> ayer		
<all sprayers=""></all>		
	OK	Cancel

## 6. Search Color

> If you want to close the search field of colors, just press the icon selected:

Search	_		
OEM	Fleet	Own	

➤ To rehabilitate the search field of color, go Colors → Search:

#### 6.1. Making color searching easy:

It is not necessary to fill all the fields when the customer has in hand the description or the color code. Otherwise it is necessary to fill the maximum fields to have the search results more precise.

After doing the above procedure is just click **Search** to the following screen appears:

OclorPro 2.6				• ×
<sup>:</sup> Colors Formulas Registers	Reports Tools System Help			
im 🗛 🗞 🗟 🕼 🚨 🌭	2 🚗 🔍 📒 💽 💻 🔑 🤹 🕂 🕂 🤗 🔝	]

· · · · · · · · · · · · · · · · · · ·				
Model				

In the search result the color patterns and their variants will appear. To view the formulas just double-click upon the description of color.

#### **6.2. IMPORTANT NOTES**

- When searching for an Astra model year 1995 you must search using Opel as the OEM.

- When the search is the **Frontier** model **2000/2004**, it is necessary to make the search for automaker **Renault**.

- When searching for the model **Silverado 1997/1998**, it is necessary to make the search for automaker **Renault**.

- To view the description of the toners on screen mixing and composition of the formula we recommend **maximizing** the window. Remembering that: changes are always **saved** after closing the window.

Black - GMA84:410	;			Autobas	e Plus 1	100:50

#### 6.3. Toner bulletins (active/inactive toners)

Every time you search for a color with more than one formula option, where one of the formulas contains a toner which will be discontinued or is already inactive and the other containing a formula using a toner which was just been added to the assortment or just a different formula the following message will appear:

The client may choose which formula to use, depending on the stock situation of the discontinued/inactive toner or the client can opt to use the other formula, see screen below:

Mahler	White - GMA400	01		Wandabase HS	
Year Variant	<u> 1994 - 2013</u>	Color type OEM	Solid General Motors USA	Type OEM	
Developed	doume: 0,001		Formula         Wariants         Descriptio           Active         Developed         Version <ul></ul>	Code         Versions         Documentation           Alternative         0         2         0         1	* H
Sales pr Color Dack	rice r	0,00	<ul> <li>Formula contains toner that will</li> <li>Formula contains active toner.</li> </ul>	be discontinued	

If the client chooses to use the formula with the discontinued or inactive toner, the client must click on the  $\bigcirc$ . This will show the information about the discontinued toner:

Mahler	White - GMA40	01				Wandab	ase HS	
Year	1994 - 2013	Color type	Solid			Туре	OEM	
/ariant		OEM	General	Motors USA

Vear	Amarelo Caterpillar MM		FLSA1099	S	2003	
2007						

## 6.5. Searching by color code combination color

Some vehicles have the code for combination colors. (main color and secondary color) To search for the color you must inform the code which is on the vehicle and select the OEM and click on **Search**:

OcolorPro				- • •
<sup>;</sup> <u>C</u> olors Formulas <u>R</u> e	egisters <u>R</u> eports <u>T</u> ools <u>S</u> ystem <u>H</u> elp			
im 🙌 %   😫   🖳	🕺 🌭 🤌 🖹 🛛 🔂 🖧 📭 🌚 🖉	] 🖉 🖨 🖸		
Search	× Formulas			×
OEM Fleet Own	G Color Description	Var Akzo Code	Type S	tart Year End Yea
Code	Comb. of DV/GL	HY0085	S	2001 2
ж	<b>•</b>			
	•			
2001 Year				
OEM				
Hyundai				

By clicking on **Description**, a screen will appear showing the colors and which parts were painted with each color:

omb. of D	V/GL - HYO	)85					
ar 20	01 - 2005	Color type	Solid		Туре	OEM	]

#### 6.6. Site Production

Now you can see the information of the country's production model for that particular color. For example, the color **CHE9550** is painted only on the model **AVEO** in Colombia:

Model		Start Year	End Year
▶ Aveo-SA		2006	6 2012
Carry		2006	5 2008
Chev. Spark-S	5A	2006	6 2010
Corsa Classic	-SA	2006	6 2007
kodiak-SA		2006	6 2008
NPB		2006	6 2008
Production origin			
Production origin:			
Production origin: Origin ► Colombia	:		

To get this information to choose the color and go Formulas> Templates or on the toolbar:

## 7. Registering own Formulas

To register your own formulas, go to **Own→F2 New formula**, or using the toolbar go to **Registers→Own Formula→Add**, and the screen below will appear where the fields highlighted in red must be filled in:

Own formula register	<b>×</b>
Product Desc	sription -
Composition Layer Layer 1	Code Date 19/09/2013
Toner         Quantity (g)           1         •           2         •           3         •           4         •           5         •	
6     •       7     •       8     •       9     •       10     •       11     •       12     •	
- Delete	0,00 liter Price: 0.00

After filling in all the required fields click on **OK.** In some cases (products) the formula will be adjusted to balance the Binder, **but the color will not suffer any changes.**

#### 7.1. Searching for Own Registered Formulas

To search for own formulas, go to **Own**→type the **Name** and/or **code** of the color and then click on →Search.

If you would like to visualize all **Own** colors, leave all search fields empty and click **Search**:

O Col	lorPro 2.6

# 8. Query Repair Order

Is it possible to fetch all orders filtering by date, sprayer, number, product, and most other fields. This function is available in **registers> Repair Orders.** 

ColorPro					
Colors Formulas	Reg	isters	Reports	Tools	System H
: M M % 😫 🚺		Own formulas		Alt+	• P 🏼 🍓 🛛 🤇
Search	<u>88</u>	Users.		Ctrl+	U
OEM Fleet Ow	۵	Spray	ers	Ctrl+	.р
Code		Toner	S	Ctrl+	в
~		Ancill	aries	Ctrl+	c
Color Description		Repai	r orders		
Marca Marca	_				
2001 Tear	_	•			

Once you enter this function only the orders from last week will appear; if you want to see all the others go at **All**, and if you want to filter these orders go in the **Filter** toolbar. This option works like the other screens of entries, allowing sorting by any column. The **View** will show all data on the service order. It will also be possible to **export** the list of orders on the option Export to **Excel**.

Register of repair order

		Repair O 0012	rder	Date 17/09/2013	Spray 15	er	User Administrador

							-
							OK

#### NOTE:

Using this feature of the program is needed when registering a service order; the registry is done when you are mixing up the toners.

	<u>R</u> epair Order	Sprayer
F8 - Tint		

х

# <u>9. Users</u>

The program allows three (3) different user access levels:

## 9.1. Access Levels per User

User	Color Selection	General Configurations	Taxes	Prices	Stock	Reports	Import and Export of Data
Management	ОК	ОК	ОК	ОК	ОК	ок	ОК
Production	ОК	OK but only visual	NO	NO	OK but only visual	NO	NO
Search	ОК	NO	NO	NO	NO	NO	NO

# 10. Customizing your program

## 10.1. Preferences

You can customize the program according to your preferences. In other words, you can standardize volumes, printing set-up, formula visualization among many other options:

On the toolbar click **System→Configuration→Preferences.** Set-up the system to your liking and click on **OK.** 

Configuration	×
8	Preferences
Preferences	Company name COMPANY NAME
Interface	Preferences
45	Show formulas with accumulated values           Ask for label printing after formula mixing
Sale	Use repair order number  Include the packaging cost in the sales price  I abel preview
Search	Select code for label printing
Label	Default volume
	English
ColorPro	
	UN Cancer

### 10.2. Search

By accessing the toolbar **System→Configuration→Search**, you can set-up the way the formula is displayed the first time, in other words, the user can select the default product line and standard documentation, see example below:

Configuration	×	
Preferences Interface Scale Search Label	Search Color documentation Select color documentation Doc1 ColorMap  Doc2 Wanda Classics  Product line Choose default product line Product Wandabase HS	
ColorPro	OK Cancel	

#### 10.3. Labels

To set-up the system to print on labels go to **System Configuration Label**: The screen below will appear where the fields in red must be informed. If the printer is not printing correctly on the label try changing the **font size**:

Configuration	
Preferences Interface Scale Search Label	Label Printer HP Universal Printing PS Message Make approval Plate Print formula Mgdel [89,0 x 36,1] mm
ColorPro —	OK Cancel

In the **message** field, it is up to the customer to filling. But always advised to put the message of **make approval plate**. This is to check if the color is in compliance with the model that will be painted.

NOTE: →If the Printer field is blank you may need to go to Start→Control Panel→Devices and Printers

Click with the right mouse button on the printer to be used and select **Set as Default Printer** and the following screen will appear;

						х
😋 🔾 🗢 📾 « All Contro	ol Panel Items 🕨 Devices and Pr	inters 🕨	<b>- - - - - - - - - -</b>	Search Devices a	nd Printers	P
Add a device Add a pri	inter See what's printing	Print server properties	Remov	e device		0
Devices (4) HP Basic USB Keyboard LE1711 SBCD317940 USB OPTICAL MOUSE	Printers and Faxes (8) Fax HP Universal Printing PCL 5 HP Universal Printing PS HP Universal Printing PS PDF-XChange 4.0 SECPLEXCO04 on sbcn00 Send To OneNote 2010	Open           Open in new window           See what's printing           Set as default printer           Printing preferences           Printer properties           Create shortcut           Troubleshoot           Remove device           Properties				

Return to the ColorPro program and click on **System→Configuration→Label** and select the printer:

**NOTE:**  $\rightarrow$  In some cases with the **Epson LX300**, a conflict error occurs, where it will only print one label. In this case you must download the driver LX300 or LX810, for the printer to function correctly.

## 10.4. Steps to Install Driver LX300

- To download this driver, you can download from the internet and in case of Windows XP or Superior; there is this driver in Windows.

Follow the installation sequence in Windows Seven (7):

- Start;
- Devices and Printers;
- Add Printer.

• Leave unchecked, the option "Detect";

• Next 2X;

Choose your printer model and driver needed.

# 11. Prices & Taxes

## 11.1. Packaging/Cans

Clicking on **System**→**Packaging**, the screen below will appear. Please note that the taxes and profit mark-up **does not include cost of packaging/cans**. In the event a client wishes to make money on the packaging the price of each packaging/can must be informed.

Select th Packagin	e packaging. g price shall be changed in the table	below.	Pa	ickagi	ng	<b>√</b>	Not available Available Selected for use
Code	Color Description	Price	1/4	1/2	3/4	1/1	Content ()
903	(cuatro) 4 OZ	0.00				1	0.118
61	3,75 L.	0.00		1		1	3.750
24	4 LITROS	0.00	1	1	1	1	4.000
74	A - QUART 750,00 ML	0.00				1	0.750
100	A - QUART:640 ML	0.00				1	0.640
04	A - QUARTO	0.00	1	1		1	0.900
75	B - 1/2 GALLON: 1500 ML	0.00				1	1.500
101	B - 1/2 GALLON: 1280 ML	0.00				1	1.280
01	B - GALÃO	0.00		1	1	1	3.600
102	C - 3/4 GALLON - 1920 ML	0.00				1	1.920
76	C - 3/4 GALLON: 2250,00 ML	0.00				1	2.250

## 11.2. Toners

By clicking on **Registers Toners**, you will see the cost price and sales prices, comprised according to the table below:

Prices	Comprised of
Pr. List	List Price
Cost	List Price + all taxes and discounts excluding profit margin

## 11.3. Pricing Tools

To access this function in ColorPro, go to **System > Pricing tools...**, as shown below:

Drising tools

						_
		Product			<u>M</u> ark Up	
ColorPro 2.6		Autobase Classic				0.00 %
Colors Registers Reports Tools System Help		Taxes Profiles				
🐁 👫 🐁   🗟   🕵   🚨 🌭 🐎   🗹 Tool Bar		Apply taxes to list price				
arch 🗙 🔽 Status Bar		Color Description	[+/-]	Value	Apply to	*
M Fleet Own Change password		► DISCOUNTS	-	0.00% All		
Code Packagings		GROSS REVENUE	+	0.00% All		
Pricing tools		VAT	+	0.00% All		
Color Description Ctrl+Q		OTHERS	-	0.00% All		
▼ Conngatutorian Catho	- 1	OTHERS	+	0.00% All		
Year Maintenance						
Blocked Formulas						_
Change database						•
		Use the same tax bracket for al	l products			
					ПК	Cancel
						Cancer

Due to some necessary changes made in the system, now to apply the taxes to the product price it is necessary to mark the option: *Apply taxes to list price*, as the picture above. This option is already checked as default. If you do not want to use taxes in ColorPro, you just clear it.

-X-1

# 12. Update via Internet

You are able to update the formula database of your ColorPro via internet. To use this function, is necessary first of all register your ColorPro.

### 12.1. Register

To make the register there are two options:

- Open the Software (After you register your software, this option will not work anymore)
- Accessing: System > Registration

To both cases will appear the screen below: In this screen you need to fill all the fields with the information about your shop or bodyshop.

Register	
Country	
Company	
Address	
ZIP State	
City	
Contact	
Telephone Email	]
Distributor	Secondary distributor
	OK Cancel

#### 12.2. Update

1) With the function register, it is not necessary you inform the login and password anymore.

2) When you launch the program it will automatically search for available updates.

a) In case an update is available, the system will ask you if you want to update. Just click on **YES** to update or **NO** to bypass the update request.

**b)** If you wish to update once the program has been launched, click on **Tools** > **Database** > **Web import** or just click on the shortcut on the toolbar.

OlorPro 2.6					
Colors Registers Reports	Тос	ols System He	lp		
im 🐴 %   8   💷 🕺 🕅		Location	Ctrl+L	<b>I</b>	
Search	6	Documentation	Ctrl+D		~ 1 m <b>^</b> 0 = -
OEM Fleet Own		Database	۰.	Export	🕒 th 📲 🚮 🖉 🖉 📷 🛐
Code		Prices	+	Import	
		Formulas	<	🌸 WEB import 🚺	
	_			the second se	

**3)** As soon as the download is finished a window will appear in order to finish the update. You will have the option of saving the downloaded files to update other computers which are not connected to the internet by clicking on **YES**; then the screen below pops up and you should select the location where you wish to save the files (diskette, CD or Pen drive...). Otherwise choose the option **NO** and the update will begin automatically.

Database up-date	
Confirm Save files after update?	<b>×</b>
	Yes No
	Start Cancel

**NOTE:** Remember that the Database ColorPro where you will download the update files should be in the same computer where you performed the update via the Internet. Otherwise, the upgrade will not happen!

The ColorPro with distribution Wanda + Sikkens, where the computer will upload the files, should contain the ColorPro with Wanda + Sikkens. Otherwise, you will not be able to carry out the process and the following message appears:

Information	×
No update files found.	
	ОК

4) To update the computers not connected to the internet, **copy** and **paste** the files you saved in the previous step to the folder **ColorPro** into **My Documents**:

My documents\ColorPro (Windows XP) Documents\ColorPro (Windows 7)

5) Launch the ColorPro of that computer and go to Tools > Database > Import and click Start to update the database.

# 13. Technical data sheets & Safety data sheets

To access the TDS & MSDS Just follow the following path in the ColorPro:

## **Tools -> Documentation**

After that click in Documentation, you can have Access to all ColorPro sheets and manuals.

# 14. Color code location in the vehicle

Go to go **Tools > Location...** 

Choose the OEM and the model of vehicle:

If appear more than one possibility of location, you can select the description that you want to check first. After selecting the description you will notice that the plaque regarding the description of the vehicle will turn yellow. See image below:

# <u> 15. Tips</u>

Pressing CTRL + H, works as a shortcut key so you have the following information about the ColorPro:

- Version of the program;
- Version database;
- Version of the distribution;
- Distribution choice;
- Data distribution;
- Server (If installed ColorPro Network);
- Checks if the installation was done in the Network, if so, how will (Client/Server) where he is selected, or if installed on Mono, as one will find (Mono).

# 16. Questions

If there are any doubts please contact customer service or your Export Manager.

Customer Service: e-mail: sac.automotive@akzonobel.com +55 11 2167 – 1840
